PLAYING THE GAME
Mighty Morphin Power Rangers Fighting Edition is a one-on-one fighting game with three different modes of play: Story Mode, Fighting Mode, and Trial Mode. You play each mode as follows:

Story Mode
If you select Story Mode, you will advance to the Story Mode Player Select Screen. Story Mode is a 1 player only mode. You can play as either the Thunder Megazord or the Mega Tigerzord. Press the Control Pad to highlight your choice. Then, press the START button. You will face a succession of opponents. You have to win two out of three rounds to defeat each opponent. If you win, you will advance to the next opponent. If you lose, you have an unlimited number of continues. When you defeat all of your opponents, you will have to defeat a special enemy to win the game.

Fighting Mode
If you select the Fighting Mode, you will advance to the Fighting Mode Player Select Screen. The Fighting Mode is a 1 or 2-player simultaneous mode where you can play against another player or against the computer. If you select the 1 player mode, you will play against the computer. Choose your character by using the Control Pad to highlight your choice. The computer (CPU) will automatically select your opponent. If you select 2-player mode, you and your opponent will each have to select a character. After you choose your characters, you will advance to the Handicap Screen. This screen lets you handicap a character in order to make the fight more even. You can set the handicap from one notch (weakest power) to 8 notches (strongest power). Press the left or right on control pad to set the handicap level.
Then, press the START button to begin the first round. You must win two out of three rounds to defeat your opponent.

**Trial Mode**
If you select Trial Mode you will advance to the Trial Mode Player Select Screen. Trial Mode is a 1-player-only sudden death mode. You select a character and the computer selects your opponent. You face each opponent for only one round. If you win, you advance to the next round and the next opponent. You can only regain partial power from one round to the next. Therefore, it is important to sustain as little damage as possible in each round. When your power is depleted, the game is over.

**The Game Screen**
All the action takes place on the Game Screen. The bar along the bottom of the screen contains all the fight data. The time is displayed at the center of the bar. The green lines along each side of the top of the bar show the two combatants' life levels. These Life Lines change color as they deplete. When one of the lines totally disappears, that character is destroyed. In the Story Mode, a lightning bolt will then appear on the winner's side of the time indicator to show that that character has won one round. If both lines disappear at the same time the round is a draw. Below the Life Lines are the Power Bars. These moving bands change color as the characters gain or lose strength. When the Power Gauge shows a lightning bolt pattern, the character is at maximum strength.
